```
  var m = SPECIAL_DAYS[month];
  if (!m) return false;
  for (var i in m) if (m[i] == day) return true;
  return false;
};

function dateChanged(calendar) {
  // Beware that this function is called even if the end-user only
  // changed the month/year.  In order to determine if a date was
  // clicked you can use the dateClicked property of the (wa8Nwwdar)-52ty)-525(.525(us)1
```
